NOTES

* **Postzon** is an additional dataset that contains grid references, NHS Health Authority and PCT codes and Local/Unitary Authority Ward codes and names.

1. PostCoder Batch is a premise level product and contains full address details including valid property names/numbers and business names.
2. Ad-hoc PAF® updates can be supplied at £75 +VAT if required.
3. Update Packs can be purchased once per licence type and don't need to be bought per user.
4. The pricing above is valid from 1st September 2008 to 1st September 2009. Any licences purchased or renewed during this period will be valid for 12 months only.
5. PAF® is the Royal Mail's Postcode Address File of 1.7 million UK Postcodes, 28 million addresses.
6. If you are planning to use PostCoder Batch to perform address cleaning services for other companies, this is covered by "Bureau Services" and has special licence terms. Please contact us for more information.
7. Royal Mail is currently reviewing the licence with a view to introducing a whole new licence from September 2009. For more information, please visit www.allies-computing.co.uk/licences.html

All prices are annual, include full Technical Support and all Royal Mail licence fees.
